MEMORANDUM FOR: Deputy Director for Management and Services

SUBJECT : Auditorium Program on the Energy Crisis

1. I am seeking approval to conduct a day-long program on Tuesday, 22 May, in the Agency Auditorium on the subject of the Energy Crisis. The program would be open to officers from throughout the Agency, and I would like to invite personnel from other intelligence agencies, especially DIA.

2. The Energy Crisis is not only of great current concern to top levels of the government and to the public, but it also has emerged as a subject involving intelligence support to policy-makers. For example, a National Intelligence Estimate on the subject is, I understand, nearing completion. I believe that a fairly wide group of intelligence collectors and analysts could benefit from such an orientation.

3. As conceived at this point and subject to the availability of outside speakers, the program would run along the following lines:

- | | |
|-----------|---|
| 0900-1130 | Presentation by Shell Oil Co. based on their recent technical forecast on the dimensions of the problem, including the assumptions and techniques used in making the forecast. |
| 1330-1430 | Talk by a government expert with primary emphasis on foreign policy implications. One possible speaker would be James Akins who has headed the State Department's Office of Fuels and Energy for four years and who was detailed to the White House last November. Another would be Gordon Brown, also from State's Office of Fuels and Energy. |
| 1445-1600 | Panel composed of this speaker and two other knowledgeable officials from elsewhere in government, such as Robert Sheppard of Commerce or Robert Plett, until recently in OEP. Much of the time would be discussion from the floor. |

MEMORANDUM FOR: Mr. Brownman via Mr. Wattles

24 APR 1973

In my opinion, this is a constructive suggestion and certainly a timely one.

I suggest, however, that it should be coordinated (perhaps by phone or at a morning meeting) with the other Deputies, the Director of National Estimates and the DCI.
